Global Trainee Program for Pharmaceutical Production

Do you have the Bayer Spirit?

Start with the right credentials

Bayer is a global enterprise with core competencies in the fields of health care, nutrition and high-tech materials. Our products and services are designed to benefit people and improve their quality of life. At the same time, we want to create value through innovation, growth and improved earning power. In this innovative environment, we build on the skills of people who know where they are heading. And on people with a flair for dealing with others.

Bayer Product Supply experts contribute greatly as a driving force for intelligent and superior solutions in the field of our pharmaceutical production. Sounds like you? Then we look forward to hearing from you.

Pharmaceutical Production Trainee program – an alternative to on-the-job-recruitment

For those first-class Pharmacie graduates (Master/PhD), who – right from the beginning – aim to gain insight on the specific scope of activities and responsibilities of different job profiles at Bayer, we offer to participate in our trainee program for Pharmaceutical Production.

You have a strong strategic thinking and leadership potential. Joining this program, you will be assigned across different manufacturing sites and headquarter functions at Bayer Healthcare Product Supply, incl.

both, operational and managerial job profiles. You are interested in an international general and/or technical management career.

Length and content of the trainee program

The 24-months program includes

- International assignments
- Training stations in different parts, e. g. Supply Centers, Contract Manufacturing, Supply Chain Management, Quality Assurance
- Participation in & running of own projects, e.g. in manufacturing, operational excellence, engineering and pharmaceutical tasks
- Participation in Management training modules
- Mentoring by an experienced Senior Bayer Product Supply Manager

Nina Kero wants to make the world a better place – for everyone. As a Customer Support Manager at Bayer, Nina knows she is doing just that.

Searching for solutions and never giving up. That is the passion that unites all of us at Bayer. We call it the Bayer Spirit. If you feel it, too, then it is high time we had a chance to talk about a career at Bayer.

How to develop and realize Supply Chain careers at Bayer?

Together with your mentor and the respective HR Business Partner, you will identify individual career perspectives, exchange feedback on your performance, and agree on development measures.

From the very beginning, excellent contribution will be excellently rewarded. This comprises not only a highly competitive compensation package but also dedicated career perspectives with job opportunities in the Bayer Group.

We are committed to jointly build on the various aspects of your employability profile and proactively identify and realize your individual “best-fit” career perspective after having successfully passed the 2-year-Trainee Program.
